

WOODWORKER' S CLUB

The Woodworkers Club was formed to bring together hobbyists and professionals who have a common woodworking interest. We exchange information concerning woodworking products, techniques, materials and etc. with emphasis on safety and building friendships.

We will meet once a month at the Welcome Center. After a short business meeting we will have a "Show and Tell" session where our craftsmen and artists will show their projects and explain their processes, sequences and techniques in building their project. We will have a break for a social period then continue with a program or demonstration.

Our own members will conduct some of our programs, however, we will bring in speakers representing a diverse range of woodcraft talents. These may be hobbyists or professional people.

Planned activities include:

- Regular meetings
- Special workshops and demonstrations
- Social activities
- Craft shows
- Exhibits and community projects
- Projects to contribute to charities
